Plan at least 20 to 25 minutes travel time depending on traffic.

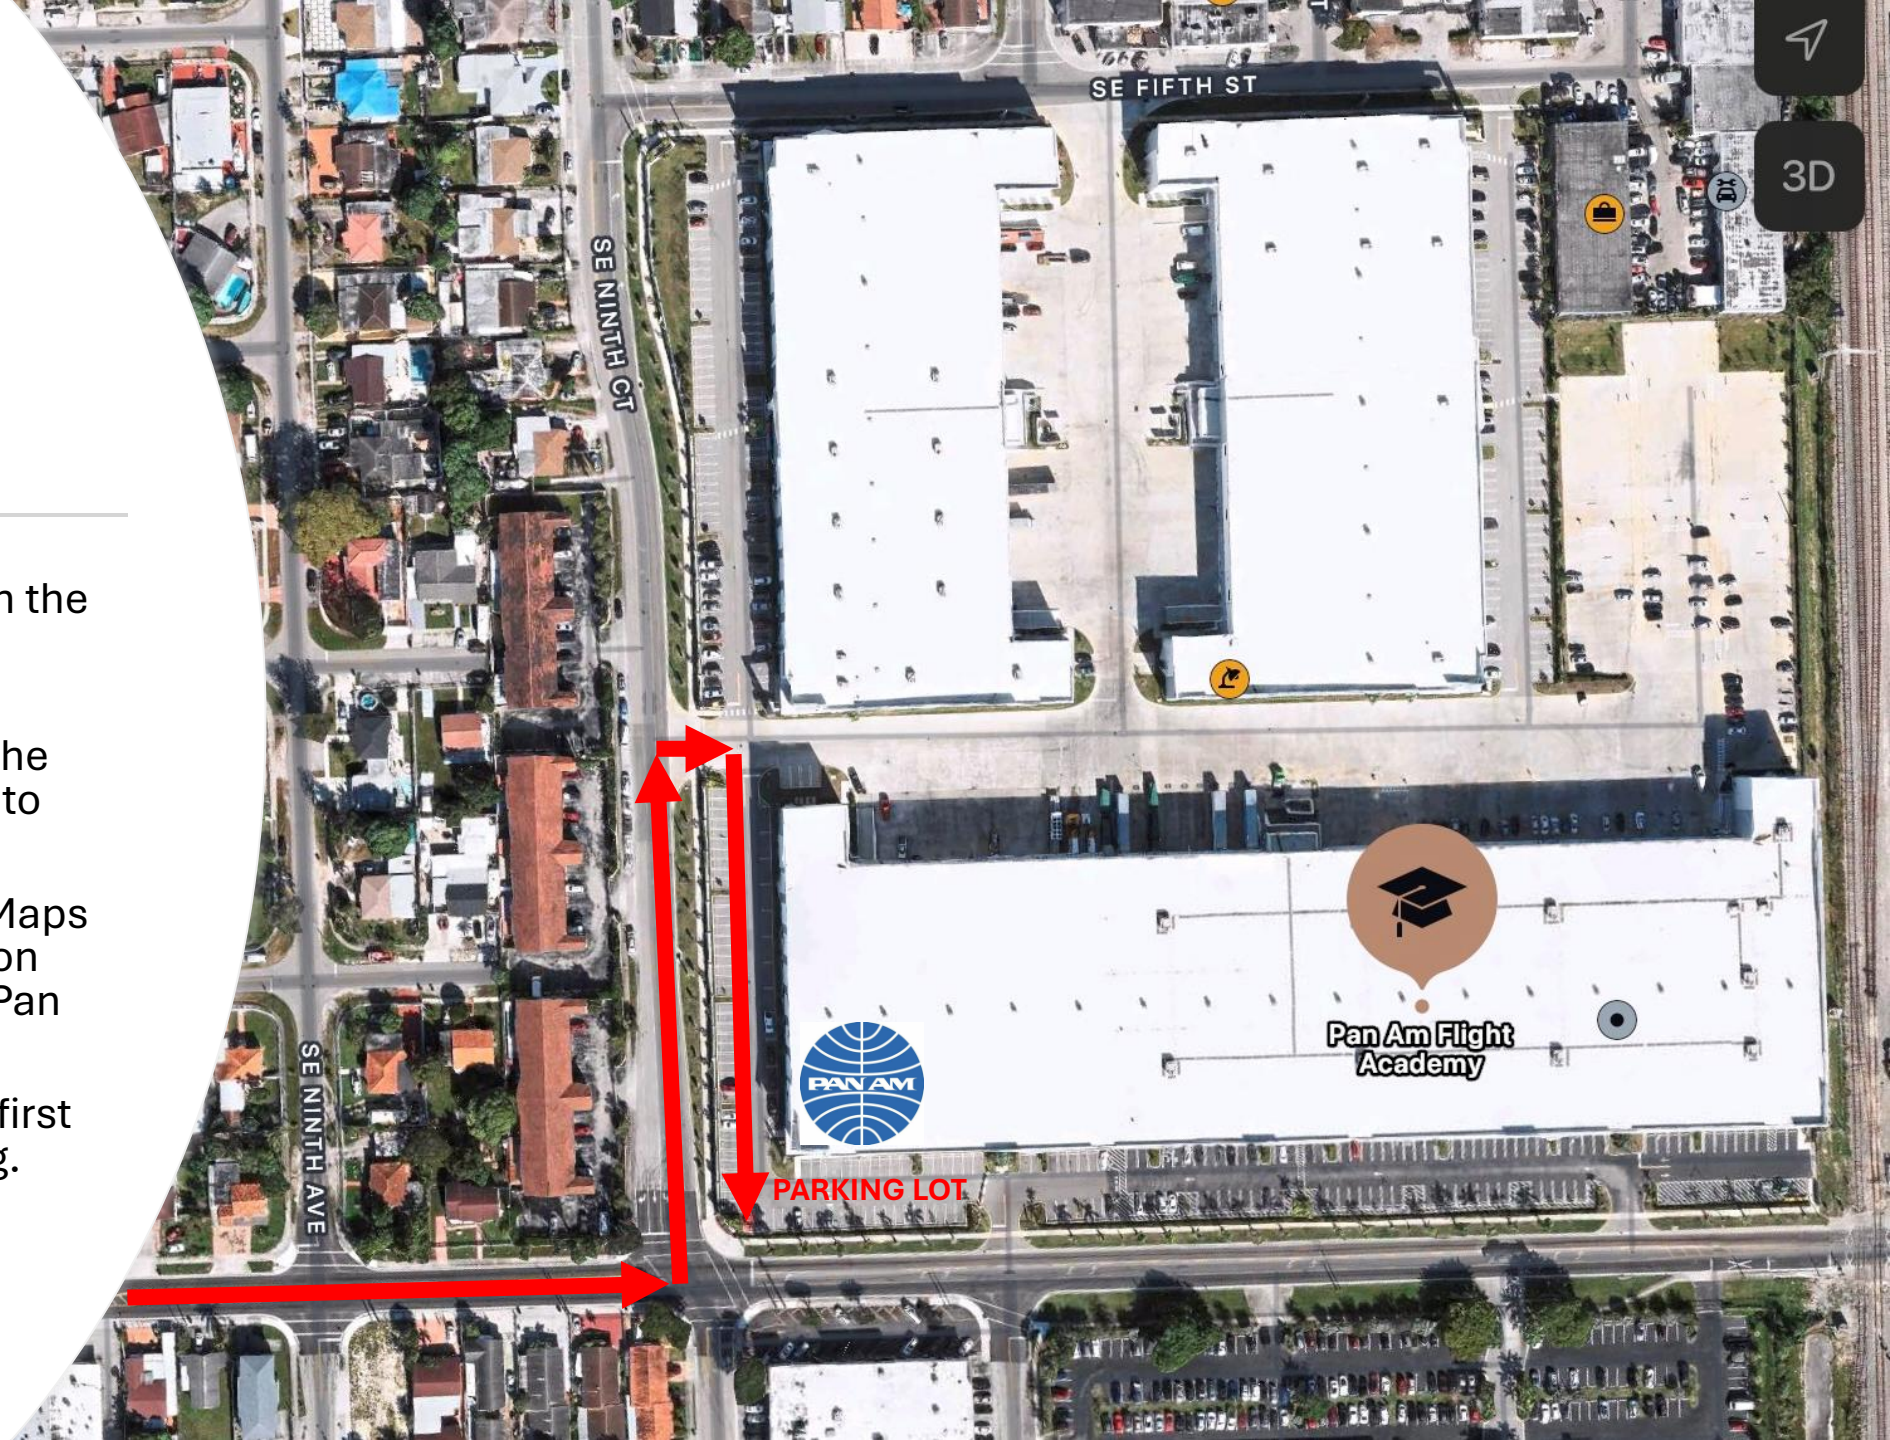

QRH and Checklists

- There is no locker at the Hialeah Facility, a 737-800 QRH along with normal checklists can be found at the main Pan Am facility located at 5000 NW 36th Street, Miami, FL, 33166.
- This facility is on the way to the Hialeah facility, you can stop here on your way to your first training session
- The locker room is on the second floor, just past the 737 #8 simulator.
- Our locker is #34, the combination is 8765.
- Please leave these documents in the locker at the end of your stay.

Hialeah Facility

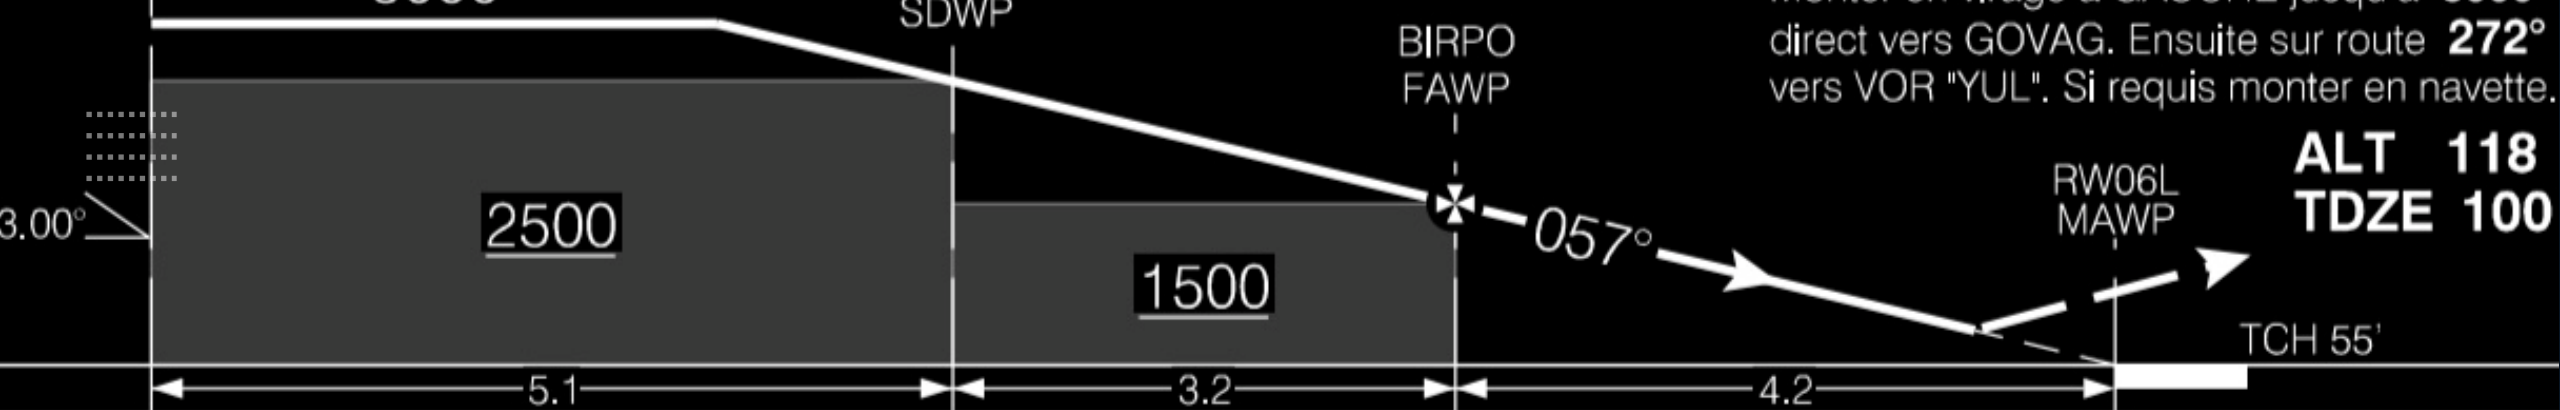

- The entry to the facility is on the southwest corner of the building.
- From Eighth Street, follow the line on the following image to find the door.
- If you follow directions on Maps you will end up at an Amazon Delivery Center instead of Pan Am.
- Plan to arrive early on your first day for final TSA processing.

Simulator Configuration

- 737 #10 has an Air Inuit configuration selectable on the IOS.
- This configuration places the aircraft in CYUL with runway 06L active.
- This configuration is close to our aircraft with the following differences:

			CATÉGORIE	A	B	C	D
			LPV	2x8	(200)	½ RVR 26	
			LNAV/VNAV (min. -18°C, max. 54°C)				
Noëuds	pi/min	min : s					
70						1 RVR 50	
90							

LPV Approach Capability

- The simulators are not qualified for LPV approach.

LNAV/VNAV Approach

- The simulators are qualified for LNAV/VNAV approaches; however, they are not equipped with the NPS scale that you saw during CPT.
- This difference has no impact on the procedure described in the SOP.
- A Vertical Deviation Scale and Pointer is displayed on the ND in MAP mode.
- XTK ERROR and VERT DEV can be displayed on the RNP PROGRESS page.

Enjoy your Training!
